

# MOHAMMED DILSHAD M

Data Analyst | Business Analyst | Power BI Developer

Jeddah, Saudi Arabia

+966500365268 | mdilshad7478@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

**Visa Status: Transferable**

**Immediate Joiner**

Highly motivated and results-oriented Data Analyst with 2+ years of experience in data analysis, visualization, and reporting. Proficient in Power BI and other BI tools for building interactive dashboards and delivering actionable business insights, with strong skills in SQL, data extraction, and data modeling. Seeking opportunities in Business Intelligence or BI Developer roles to apply my technical expertise and support data-driven decision-making.

## EDUCATION:

---

Integrated MSc in Statistics  
Cochin University of Science and Technology  
CGPA = 7.8 (out of 10)

## SKILLS

- 
- |                                    |                                       |
|------------------------------------|---------------------------------------|
| • Data Analysis & Interpretation   | • Python Scripting                    |
| • Data Cleaning & Preprocessing    | • Dashboarding & KPI Monitoring       |
| • Predictive Modeling              | • Automation & Workflow Optimization  |
| • Data Modeling                    | • Critical Thinking & Problem Solving |
| • SQL Optimization & ETL Processes | • Teamwork & Communication            |
| • Statistical Tools (SAS, SPSS, R) | • Time Management                     |

## Analytical Tools & Programming Language | Platforms

- |                 |                  |                          |
|-----------------|------------------|--------------------------|
| • Python        | • MySQL          | • Microsoft Fabric       |
| • Power BI      | • Advanced Excel | • Power Apps             |
| • Looker Studio | • Power Query M  | • Microsoft Dynamics 365 |
| • SQL           | • Macros         | • Google Sheets          |
| • Pivot Table   | • VBA            | • Lucidchart             |
| • DAX           | • R programming  | • Figma                  |

## CERTIFICATIONS / AWARDS:

- 
- **Machine learning** Specialization – Stanford Online
  - **IBM Data Science** orientation
  - Harnessing the Power of Data with **Power BI** – Microsoft/Coursera
  - **Data Analytics** with **Python** from IIT Roorkee & NPTEL
  - **SQL** for **Data Science** – Coursera

## WORK EXPERIENCE:

---

Business Analyst

**Interval Learning** (well-renowned global platform for education)

Apr 2024 – May 2025

 [LinkedIn Profile](#)

### Roles and Responsibilities

- Developed and managed interactive dashboards in **Power BI** and other **BI tools** empowering decision-makers with clear operational and strategic insights.
- Designed database flow using **Lucidchart** to support efficient SQL data access and streamline future analytical tasks.
- Managed cross-departmental data extraction using **SQL**, ensuring consistent, accurate, and timely reporting.
- Collaborated with cross-functional teams to define and monitor KPIs, supporting data-driven decision-making.
- Standardized data structures across sources, enhancing consistency, integrity, and reporting efficiency.
- Performed sentiment analysis on customer and product feedback using **Python** and Power BI, visualized through word clouds to identify key quality improvement areas.
- Conducted sales forecasting using historical data and time-series analysis, supporting strategic planning for the operational growth department.

### **Summer Intern – Periodic Labour Force Survey**

**National Sample Survey Office (NSSO)**, Srinagar, India

Jun 2023 – Aug 2023

### Roles and Responsibilities

- Participated in the implementation of the Periodic Labour Force Survey (PLFS), a flagship national survey to assess employment and unemployment trends across India.
- Conducted structured field data collection and revisits using NSSO's official sampling methodology.
- Assisted in cleaning and validating data, and contributed to statistical analysis of employment and unemployment rates in relation to educational qualifications.
- Supported the preparation of field reports to inform regional employment policy and planning.

## MAJOR PROJECTS:

---

**Blinkit 360° Business Intelligence** - [Power BI | MySQL | DAX | Figma] [Link](#)

Jan 2024

- Developed a full-scale BI dashboard simulating a Blinkit-like quick-commerce environment, covering operations, inventory, sales, customer behavior, and marketing performance.
- Designed interactive dashboards with dynamic filters (region, category, time period, customer segment), enabling drill-down analysis for stakeholders.
- Built KPI cards for key business domains, reducing simulated time-to-insight by ~40% through optimized data modeling and refresh pipelines.
- Integrated order and inventory datasets to simulate a 12% reduction in stockouts and a 15% improvement in inventory turnover.
- Applied advanced DAX and ETL logic for real-time analytics simulation, aligning metrics with business goals and user experience design via Figma references.

**Healthcare ER Analytics** - Patient Flow Optimization [Power BI | SQL | DAX | Python] [Link](#)

Dec 2023

- Developed a Power BI dashboard to analyze emergency room operations, enhancing visibility into patient flow and departmental efficiency.

- Performed data cleaning and modeling on visit-level data to track wait times, satisfaction trends, and referral vs. walk-in behavior.
- Visualized monthly and demographic trends to support staffing, inclusive care strategies, and service quality improvements.
- Identified operational gaps through patterns in "Service Not Rated" and optimized time-based insights using DAX.

**AtliQ Hardware Sales Analytics** – Retail Sales Dashboard [Power BI | SQL | Power Query] [Link](#) **Oct 2023**

- Built an interactive Power BI dashboard to analyze sales by region, product, and time, enabling data-driven decisions.
- Designed a clean star schema using SQL and Power Query, transforming messy regional datasets and converting currencies for consistent reporting.
- Improved visibility into growth trends and sales gaps, supporting an estimated 7% revenue increase through actionable insights.

**PwC Power BI Job Simulation** — Virtual Internship [Power BI | DAX | Power Query] [Link](#) **Feb 2023**

- Completed a scenario-based internship with PwC Switzerland, delivering dashboards across Call Center, Customer Retention, and HR Diversity domains.
- Designed role-specific KPIs and visual reports, applying Power Query for cleaning and DAX for performance metrics.
- Simulated real-world stakeholder needs by aligning insights with operational goals across multiple departments.

**Flight Fare Prediction and Analysis (M.Sc. Final Project)** [Link](#) **(2023-2024)**

- Developed machine learning regression models (Linear, Random Forest, XGBoost, Lasso etc) to predict flight fares using historical data and engineered relevant features.
- Built an interactive Power BI dashboard for dynamic visualization of airfare trends by airline, class, stops, and travel time.
- **Tools Used** Python, Power BI, Feature Engineering.
- **Skills Demonstrated:** Machine Learning, Regression Analysis, Data Preprocessing, Feature Engineering, Data Visualization

**PERSONAL INFORMATION:**

---

|                  |                        |
|------------------|------------------------|
| Gender           | Male                   |
| Date of Birth    | 11th March 1999        |
| Nationality      | Indian                 |
| Passport No      | Y3516760               |
| Driving License  | India                  |
| Religion         | Islam                  |
| Languages Spoken | English, Hindi, Arabic |

I hereby declare that the particulars given above are true to the best of my knowledge and belief.
